**Section II**

**Scope**

This specification define the requirements for applying primer, top coat, method of application, color and finish requirement of coating system as applicable to Dresser Masoneilan products. This Painting specification is prepared in compliance with requirements specified in SAES-H-001, SAES-H-101V and P.O 5000103311.

**2.1 General**

- a) The types of paint described herein are two components (Resin and Curing agent) system.
- b) All paint material shall be stored in conditions recommended by the paint manufacturer.
- c) All paint material shall be lead free.
- d) No paint shall be used beyond its shelf life (Recommended by paint manufacturer/SAES-H-101V)
- e) Any paint which has gelled or settled during shortage shall not be used.
- f) All paint material shall be supplied to the work site/ paint booth in original unopened and clearly identifiable containers.
- g) MTC's for Paints & Abrasive Type Analysis

 <b>OPERATING PROCEDURE</b>	<b>Effective Date</b> <b>Feb 26, 2025</b>	<b>Instruction No.</b> QAOP 37
	<b>Rev. No. A</b>	<b>Page 3 of 6</b>
<b>Subject:</b>  <b>PAINTING SPECIFICATION FOR CONTROL VALVE</b>	<b>Originating Dept.</b>	<b>QA</b>
	<b>Approved by</b>	<b>Fahad (QA – In-Charge)</b>
2.2 Application Methods		
<p>a) All painting system will be applied according to the paint manufacture's recommendations. The paint is applied using an airless spray system in paint booths.</p> <p>b) Apply primer and top coat with an airless system. The applied coats shall be a continuous full bodies film covering all surfaces, and shall be sprayed into corners, depressions etc. completely cover bolt heads, nuts, all ferrous surface, and other areas not protected or masked. Finished surfaces shall be uniform in color free from pin holes, sags, runs, dripping, orange peel effect, or other imperfection. Surfaces, which will be top coated to their attachment.</p>		
<h3>Section III. Surface Preparation</h3> <p>3.1 Scope Of Work For Surface Preparation</p> <p>This specification establishes the surface preparation of control valve, Level transmitter, and accessories at DARVICO premises.</p> <p>a) Prior to the application of coating, all surfaces shall be cleaned free from dirt, grease, oil etc. with NAVI WASHER 99330 or equivalent, weld flux, rust, scale or other substance detrimental to the coating process shall be removed by suitable mechanism, blast cleaning method shall be applied wherever required.</p> <p>b) The cleaning process used shall be compatible with the alloys, coatings, and material of all parts of an assembly. Care shall be taken to not injure or impair any prior coating or surface treatments.</p> <p>c) Suitable precautions shall be taken to maintain maximum cleanliness of the assembly throughout the entire painting process.</p> <p>d) Mechanism of parts which are exposed eg., threaded rods or shafts used for adjustments or setting and mechanical linkages, shall be suitably masked or protected from paint coating insofar as the paint would interfere or restrict their operational and function.</p> <p>e) Identification plates, instruction plates, scale plates, etc. permanently affixed to the assembly shall be suitably protected or masked to prevent defacement by paint. Holes and other opening shall be plugged or masked when topcoat or primer should be excluded from entry.</p> <p>f) Abrasive (Garnet) blasting shall be applicable before first coat or wherever valve surfaces so dirty or corroded but which shall be done only after protection of Identification plates, instruction plates, scale plates, arrow plates, stud holes, studs and nuts and other opening etc. These can be protected by plugged or suitable masked. The abrasive material is Australian Garnet 30/60. The reference standards for abrasive blasting shall be SIS 05-59-00 and SSPC-Vis 1.</p> <p>h) The surface cleanliness finish shall be minimum as advised in the Paint Manufacturer datasheet.</p>		

 <b>OPERATING PROCEDURE</b>	<b>Effective Date</b> <b>Feb 26, 2025</b>	<b>Instruction No.</b> QAOP 37
<b>Subject:</b>  <b>PAINTING SPECIFICATION FOR CONTROL VALVE</b>	<b>Rev. No. A</b>	<b>Page 4 of 6</b>
	<b>Originating Dept.</b>	<b>QA</b>
	<b>Approved by</b>	<b>Fahad (QA – In-Charge)</b>
<p><b>3.2 Pre-blast Check</b></p> <p>1. The coating inspector shall decide if the substrate requires solvent or detergent cleaning before abrasive blasting.      2. Prior to blasting, rough welds and cut-offs shall be ground to a minimum radius to ensure proper coating application. Weld spatter shall be removed.      3. Abrasive blasting shall be carried out only when the steel surface is at least 3°C (5°F) above the Dew Point.      4. Surface profile check with replica tape if the shot blast is done per blast cleanliness level SSPC-SP10      5. Atmospheric &amp; weather condition check e.g. ambient temperature, substrate temperature, humidity, dew point.</p>		
<p><b>Section IV. Coating system</b></p> <p>For projects ARAMCO, Masoneilan standard shall follow according to <b>applicable operating temperature</b> due applied.</p> <p>The coating shall be as per applicable painting system.</p>		
<p><b>4.1 Paint Preparation</b></p> <ul style="list-style-type: none"> <li>a) Thoroughly mix base (Resin), Hardener (curing agent) and solvent as instructed by paint manufacture.</li> <li>b) Adjust viscosity of top coat preparation for the particular method application used, at ambient temperature by using solvent. The type and quantity of solvent should be as described in manufacture data sheet.</li> <li>c) Do not use paint under 10degC/50F or over 38degC/100F. Preferred temperature is in the range of 24degC/ 75F.</li> <li>d) Paint mixture shall be thoroughly stirred and allow to keep 10 minutes before use.</li> <li>e) Pot life. : Shall be as recommended by Paint Manufacturer.</li> <li>f) Cleaned surfaces shall be primed or coated before the surface condition degrades below the specified cleanliness level requirement</li> <li>g) Abrasive blast cleaned surfaces shall be re-inspected prior to priming or coating if the surfaces are held for more than 4 hours after blasting</li> </ul>		
<p><b>Note:-</b></p> <ul style="list-style-type: none"> <li>1) Painting system shall be followed as per Document No. P.O. 5000103311</li> <li>2) For ARAMCO projects where ever APICS is specified, the same shall be followed.</li> <li>3) Optional top coat paint shall be used on special request.</li> <li>4) Abrasive Quality: - Batch certification shall be provided to ensure the quality of abrasive.</li> <li>5) Calibration of instrument and equipment shall be provided for review.</li> <li>6) Testing Equipment's:- Surface profile thickness gauge shall be provided for review.</li> <li>7) Surface preparation profile preparation shall be done before coating.</li> <li>8) In multi-coat applications, primer, intermediate coat, and topcoats shall be of contrasting colors and from the same coating manufacturer [SAES-H-001 § 9.2.2].</li> <li>9) Repair &amp; Maintenance: - Repair &amp; maintenance coatings shall be selected as per the SAES-H-001/002/003, relevant APICS approved paint Manufacturer's datasheets in SAES-H-101V/002V and as per requirements specified in this project.</li> </ul>

## OPERATING PROCEDURE

**Subject:**

### PAINTING SPECIFICATION FOR CONTROL VALVE

#### 5.2 Painting Valve Body

**Effective Date**  
**Feb 26, 2025**

**Instruction**  
**No. QAOP 37**

**Rev. No. A**

**Page 5 of 6**

**Originating Dept.**

**QA**

**Approved by**

**Fahad  
(QA – In-Charge)**

Steam out temperature need to be considered for painting, hence for some valves, painting system is changed to APCS-11C.  
Please add APCS-11C painting details.

Carbon Steel and Alloy Steel shall be painted as per below table, considering the service temperature.

**Service Temperature: 79.5 0 C / 175 0 F up to 120 0 C / 248 0 F**

Primer – First Coat

Surface Profile: 40-65 microns

Reference	ARAMCO standard APCS-1A
Type of coating	Epoxy Coating (Inorganic Zinc-Priming)
Surface Cleaness	Sa. 2 ½
Priming	HEMPPEL's GALVOSIL 15780 (Solvent based)
Dry Film Thk.	65 microns
Application	Airless spray

Intermediate

Reference	ARAMCO standard APCS-1A
Type of coating	Epoxy Coating Polyamide cured
Product	HEMPADUR MASTIC 45881
Dry Film Thk.	100-110 microns
Application	Airless spray

Top Coat

Reference	ARAMCO standard APCS-1A
Type of coating	Epoxy Coating Polyamide cured
Product	HEMPADUR MASTIC 45881
Dry Film Thk.	100-110 microns
Shade / Colour	RAL 9006 / Aluminum
Application	Airless spray

Minimum System Dry Film Thickness: 265 microns (refer product MSDS for DFT ranges)

**NOTE:- In multi-coat applications, primer, intermediate coat, and topcoats shall be of contrasting colors and from the same coating manufacturer [SAES-H-001 § 9.2.2]**

 <b>OPERATING PROCEDURE</b>	<b>Effective Date</b> <b>Feb 26, 2025</b>	<b>Instruction No.</b> QAOP 37

### 5.3 Painting Valve Body

Insulated carbon Steel and Alloy Steel shall be painted as per below table, considering the service temperature.

**Service Temperature: up to 90 0 C / 194 0 F**

Primer – First Coat

Surface Profile: 40-65 microns

Reference	ARAMCO standard APCS-2A
Type of coating	Epoxy Coating System for General Immersion Service
Surface Cleaness	Sa. 3
Priming	Hempadur 85671
Dry Film Thk.	100 microns
Application	Airless spray

Intermediate

Reference	ARAMCO standard APCS-2A
Type of coating	Epoxy Coating System for General Immersion Service
Product	Hempadur 85671
Dry Film Thk.	100 microns
Application	Airless spray

Top Coat

Reference	ARAMCO standard APCS-2A
Type of coating	Epoxy Coating System for General Immersion Service
Product	Hempadur 85671
Dry Film Thk.	100 microns
Shade / Colour	RAL 9006 / Aluminum
Application	Airless spray

Minimum System Dry Film Thickness: 300 microns (refer product MSDS for DFT ranges)

**NOTE:- In multi-coat applications, primer, intermediate coat, and topcoats shall be of contrasting colors and from the same coating manufacturer [SAES-H-001 § 9.2.2]**

 <b>OPERATING PROCEDURE</b>	<b>Effective Date</b> Dec 28, 2024	<b>Instruction No.</b> QAOP 37
	<b>Rev. No.</b> A	<b>Page 6 of 6</b>
<b>Subject:</b>  <b>PAINTING SPECIFICATION FOR CONTROL VALVE</b>	<b>Originating Dept.</b>	<b>QA</b>
	<b>Approved by</b>	<b>Fahad (QA – In-Charge)</b>

## Section VI. Inspection & Testing

Requirements in this section refer only to coating in the following categories:

- a) New construction
- b) Major renovation

The requirements of SAEP-316 apply to these categories when the coating is performed in Saudi Arabia.

Coating inspector, Blaster, Supervisor and Applicators shall have approval from Aramco in accordance with approved project painting specification. Third Party Training Company certification (NACE, SSPC or equivalent) or Saudi Aramco approved coating supplier for the type of coating to be applied."

### Quality Control Equipment :

The coating contractor shall have the quality control equipment listed in (Attachment A of SAES-H-001) on site for the inspection of surface preparation and coatings application.

### Quality Control Records :

Quality Control Equipment Check Sheet – (Attachment B of SAES-H-001) :

This form shall be completed prior to job start-up. It shall be completed and signed by the coating contractor supervisor and then signed by the Saudi Aramco Inspector. No work is allowed until this form is completed.

### Daily Job Log:

The coating contractor supervisor shall fill out a log, on a daily basis, recording all problem areas, delays, non-compliances, and corrective actions taken for Saudi Aramco inspector witnessing and surveillance.

### In-process Inspection Sheet – (Attachment C of SAES-H-001) :

This form shall be completed and signed every work-day by the contractor supervisor. The Saudi Aramco inspector shall initial each item marked with an asterisk before work is allowed to begin on subsequent items.

### Coatings and Equipment Log – (Attachment D of SAES-H-001) :

This form shall be completed and signed by the coating contractor supervisor and verified and signed by the Saudi Aramco inspector.

### Non Conformance Report :

The non-conformance report shall be issued whenever any defect is resulted by coating materials deficiencies or/and application malfunctioning. Remedial action and method of repair shall be defined and agreed. The Saudi Aramco inspector shall ensure that report copies have been routinely circulated and remedial actions have been implemented correctly.

### Additional Inspection Requirements Applicable to Purchase Orders :

Saudi Aramco Form 175-091900 applies whenever this Standard is referenced in a Purchase Order.

## Section VII. Acceptance Criteria

1. Check painting thickness at 5 points minimum and ensure the average points are according to standard film thickness specified in the painting procedure.

# Hempel's Galvosil 15780

## Product characteristics

### Description

Hempel's Galvosil 15780 is a two-component, medium-zinc, solvent-borne, selfcuring inorganic zinc silicate coating. Applicable by airless spray.

Hempel's Zinc metal pigment 97170 is in full compliance with ISO 3549 and ASTM D520 type II.

### Recommended use

As a general purpose rust-preventing primer in paint systems for long-life protection of steel exposed to moderately to severely corrosive environment. In compliance with SSPC-Paint 20, type 1, level 2.

### Service temperature:

- Without topcoat: maximum, dry, atmospheric exposure: 540°C [1004°F].
- Wet service temperatures: Please consult the Chemical protection guide at [hempel.com](http://hempel.com).

## Product safety

**Flash point** 14°C [57°F]

### VOC content mixed product

Legislation	Value
EU	471 g/L [3.93 lb/US gal]
US (coatings)	471 g/L [3.93 lb/US gal]
US (regulatory)	471 g/L [3.93 lb/US gal]
China	471 g/L [3.93 lb/US gal]

According to specific legislation, see details in the Explanatory Notes available at Hempel website, [hempel.com](http://hempel.com) or at your local Hempel website. According to EPA Method 24.

### Handling

Handle with care. Before and during use, observe safety labels on packaging and paint containers and follow all local and national safety regulations. Always consult Hempel's Safety Data Sheet for this product along with the Product Data Sheet.

For professional use only.

## Product data

### Product code

15780

### Product components

Base 15789  
Zinc 97170

### Standard shade / code

Grey 19840

### Gloss

Flat

### Volume solids

62 ± 2%

### Specific gravity

2.3 kg/L [19 lb/US gal]

### Reference dry film thickness

50 micron [2.0 mils]

## Surface preparation

### Cleanliness

- Remove oil, grease and other contaminants by suitable detergent cleaning.
- Remove salts, detergents and other contaminants by high pressure fresh water cleaning.

### New build:

- Abrasive blasting to min. Sa 2½ (ISO 8501-1) / SP 10 (SSPC).
- Remove dust, blast media and loose materials.

### Maintenance and Repair

- According to Hempel's Specification.

### Roughness

- Surface profile Medium (G) (ISO 8503-2).

Consult Hempel's separate Surface Preparation Guidelines for more details.

# Hempel's Galvosil 15780

## Application

### Mixing ratio

Base 15789 : Zinc 97170  
(4.2 : 5.8 by weight)

Products containing floating or settling particles/pigments need to be continuously stirred during application. This is especially important in case of heavy thinning.

### Thinner

Hempel's Thinner 08700  
Hempel's Accelerator & Thinner 0870M

### Cleaner

Hempel's Thinner 08700

### Pot life

<b>Product temperature</b>	<b>20°C</b> [68°F]
Pot life	4 hours

### Application method

Tool	Thinning max vol.	Application parameters
Airless spray	10%	Nozzle pressure: 100 bar [1500 psi] Nozzle orifice: 0.019-0.023"
Air spray	10%	Not Applicable.
Brush	10%	Not Applicable.

To minimise dry spray at high temperatures, extra thinning may be necessary. If brush or roller application is used, more coats will be necessary to achieve the specified dry film thickness. Spray data are indicative and subject to adjustment. Pressure is for a material temperature of 20°C [68°F].

### Film thickness

Specification range	Low	High	Recommended
Dry film thickness	50 micron [2.0 mils]	80 micron [3.1 mils]	50 micron [2.0 mils]
Wet film thickness	80 micron [3 mils]	130 micron [5 mils]	80 micron [3 mils]
Theoretical spreading rate	12 m <sup>2</sup> /L [490 sq ft/US gal]	7.7 m <sup>2</sup> /L [310 sq ft/US gal]	12 m <sup>2</sup> /L [490 sq ft/US gal]

### Application conditions

- To avoid condensation, apply on a clean and dry surface with a temperature that is at least 3°C [5°F] above the dew point.
- Surface temperature must be above 0°C [32°F] during application and curing.
- Surface temperature must be below 40°C [104°F] during application and curing.

### Relative Humidity:

- Relative humidity must be above 50% during curing.

### Application remarks

- Consult Hempel's Application Guidelines and Instructions for more details.

## Drying and overcoating

### Product compatibility

- Previous coat: None.
- Subsequent coat: According to Hempel's Specification.

### Drying time

Surface temperature	20°C [68°F]
Touch dry	min 15
Fully cured	hours 16

Determined for dry film thickness 50 micron [2.0 mils] at standard conditions, see Hempel's Explanatory Notes for details.

### Overcoating

Overcoating times are indicative for products of the same generic chemistry. Consult Hempel's specification for more information.

# Hempel's Galvosil 15780

## Drying conditions

- To obtain the drying time stated, it is important to maintain sufficient ventilation during application, drying and curing.

## Overcoating details

- Remove zinc salts or other contamination before overcoating.
- Flash-coat technique is recommended when overcoating Galvosil qualities.
- Inorganic zinc silicates must be fully cured before overcoating.

## Storage

### Shelf life

Ambient temperature	25°C [77°F]
Base	6 months
Zinc	36 months

Shelf life from date of production, when stored in original, unopened containers. Thereafter, the product quality must be re-inspected. Storage at elevated temperatures may reduce shelf life. For advice, please consult Hempel.

### Storage conditions

- Product must be stored according to local legislation, at maximum 40°C [104°F], without direct sunlight and protected from rain and snow.
- Must be stored under absolutely dry conditions, protect against seeping humidity.

## Additional documents

Additional information is available at the Hempel website <https://www.hempel.com/service-and-support/technical-guidelines> or at your local Hempel website:

- Explanatory Notes for Product Data Sheet.
- Application methods.
- General Application Guidelines

This Product Data Sheet ("PDS") relates to the supplied product ("Product") and is subject to updating from time-to-time. Accordingly, the buyer/applicator should have regard to the PDS supplied together with the relevant batch of the Product (and not an earlier version). In addition to the PDS, the buyer/applicator may receive some or all of the following specifications, statements and/or guidelines as listed below or as are available from the Hempel website under 'Products' at [www.hempel.com](http://www.hempel.com) (the "Additional documents").

No.	Document description	Location/comments
1.	Technical Statement	One-off specific advice provided on request for specific projects
2.	Specification	Only issued for specific projects
3.	PDS	This document
4.	Explanatory Notes to the PDS	Available at <a href="http://www.hempel.com">www.hempel.com</a> and contain relevant information about the Product testing parameters
5.	Application Instruction	Where available, at <a href="http://www.hempel.com">www.hempel.com</a>
6.	Generic technical guidelines (e.g. on application and surface preparation)	Where available, at <a href="http://www.hempel.com">www.hempel.com</a>

In the event of a conflict of information between the PDS and the Additional documents, the order of priority of information shall be in the order as set out above. In such event you should also contact your representative at Hempel for clarification. Furthermore, the buyer/applicator must have full regard to the relevant Safety Data Sheet provided with each Product and which can also be downloaded from [www.hempel.com](http://www.hempel.com).

Hempel shall not be liable for defects where the application of the Product has not been made fully in accordance with the recommendations and requirements set out in the relevant PDS and the Additional Documents. The information and terms of this disclaimer apply to this PDS, the Additional documents and any other documents supplied by Hempel in respect of the Product. In addition, the Product is supplied and all technical assistance is given subject to Hempel's General Conditions of Sale, Delivery and Service, unless otherwise expressly agreed in writing.

# Hempadur Mastic 45881

## Product characteristics

### Description

Hempadur Mastic 45881 is a polyamide curing, high solids epoxy paint. It forms a hard and tough coating, and has good wetting properties. Complies with EU Directive 2004/42/EC, The Paints Directive on the limitation of volatile organic compounds: subcategory j.

### Recommended use

Hempadur Mastic 45881 is recommended as a self-primed, surface tolerant paint system, or as an intermediate or a topcoat in heavy duty paint systems where low VOC and high film build are required. The product can be used where extended recoating properties for polyurethane topcoats are requested. It may also be used directly on zinc silicate or spray metallized surfaces. The product can be used for minor repairs in immersed areas.

### Service temperature:

- Maximum, dry exposure only: 120°C [248°F].

### Certificates / Approvals

- EC-type examined as a low flame spread material when used as part of a predefined paint system. Please refer to "Declaration of Conformity" on [hempel.com](#) for further details.
- Complies with US FDA and EU food regulations for contact with dry foodstuff. Consult Hempel for details.

### Features

- Versatile.
- High surface tolerance.

## Product safety

**Flash point** 39°C [102°F]

### VOC content mixed product

Legislation	Value	5% thinning, by volume	Limit value, phase II (2010) <sup>a</sup>
EU	218 g/L [1.82 lb/US gal]	250 g/L [2.09 lb/US gal]	500 g/L [4.17 lb/US gal]

## Surface preparation

**Cleanliness**

- Remove oil, grease and other contaminants by suitable detergent cleaning.
- Remove salts, detergents and other contaminants by high pressure fresh water cleaning.

**New build:**

- Abrasive blasting to min. Sa 2½ (ISO 8501-1) / SP 10 (SSPC).
- Concrete: According to Hempel's Specification.
- Remove dust, blast media and loose materials.

**Maintenance and Repair**

- Spot abrasive blasting to min. PSa 2 (ISO 8501-2) / SP 6 (SSPC).
- Minor areas may be hand or power tool cleaned instead of abrasive blasting.
- Water jetting to min. Wa 2 (ISO 8501-4).
- Flash rust degree of maximum FR M (ISO 8501-4).
- Remove dust, blast media and loose materials.

**Roughness**

- Surface profile Medium (G) (ISO 8503-2).

Consult Hempel's separate Surface Preparation Guidelines for more details.

## Application

**Mixing ratio**

Base 45889 : Curing Agent 95881  
(3 : 1 by volume)

Stir well before use.

**Thinner**

Hempel's Thinner 08450

**Cleaner**

Hempel's Tool Cleaner 99610

**Pot life**

Product temperature	20°C [68°F]	30°C [86°F]
Pot life	2 hours	1½ hours

**Application method**

Tool	Application parameters
Airless spray	Nozzle pressure: 250 bar [3600 psi] Nozzle orifice: 0.017-0.023"
Brush	Not Applicable.
Roller	Not Applicable.

If brush or roller application is used, more coats will be necessary to achieve the specified dry film thickness. Spray data are indicative and subject to adjustment. Pressure is for a material temperature of 20°C [68°F].

# Hempadur Mastic 45881

## Film thickness

Specification range	Low	High	Recommended
Dry film thickness	100 micron [3.9 mils]	200 micron [7.9 mils]	125 micron [4.9 mils]
Wet film thickness	125 micron [5 mils]	250 micron [10 mils]	150 micron [6 mils]
Theoretical spreading rate	8 m <sup>2</sup> /L [330 sq ft/US gal]	4 m <sup>2</sup> /L [160 sq ft/US gal]	6.4 m <sup>2</sup> /L [260 sq ft/US gal]

Product may be specified in another film thickness than indicated depending on purpose and area of use. This will alter spreading rate, drying and curing time and overcoating interval. For best performance, avoid excessive film thickness.

## Application conditions

- Temperature of product must be above 15°C [59°F] during application.
- Surface temperature must be above 15°C [59°F] during application and curing.
- To avoid condensation, apply on a clean and dry surface with a temperature that is at least 3°C [5°F] above the dew point.

## Relative Humidity:

- Relative humidity must be below 85% during drying and curing.

## Drying and overcoating

### Product compatibility

- Previous coat: None or according to Hempel's specification.
- Subsequent coat: None or according to Hempel's specification.

### Drying time

Surface temperature		20°C [68°F]
Hard dry	hours	4
Fully cured	days	7

Determined for dry film thickness 125 micron [4.9 mils] at standard conditions, see Hempel's Explanatory Notes for details.

## Overcoating

Hempel's specification supersedes any guidelines indicated in the overcoating table

Quality name		20°C [68°F]	30°C [86°F]	40°C [104°F]
Atmospheric medium				
Hempadur Mastic 45881	Min Max	7 h Ext*	5½ h Ext	3½ h Ext
Hempathane HS 55610	Min Max	6 h Ext*	5 h Ext	3 h Ext
Atmospheric severe				
Hempadur Mastic 45881	Min Max	10 h Ext*	8 h Ext	5 h Ext
Hempathane HS 55610	Min Max	10 h 72 h	8 h 54 h	5 h 36 h

Overcoating times are indicative for products of the same generic chemistry. Consult Hempel's specification for more information.

## Drying conditions

- To obtain the drying time stated, it is important to maintain sufficient ventilation during application, drying and curing.

## Overcoating details

- If the maximum overcoating interval is exceeded, roughening of the surface is necessary to ensure intercoat adhesion.
- The surface must be dry and clean prior to application.

## Other remarks

- Epoxy coats have an inherent tendency of chalking in outdoor exposure. This does not affect the performance of the coating.
- Hempel's Specification supersedes any recommendations given in the Product Data Sheets.

# Hempadur Mastic 45881

## Storage

### Shelf life

Ambient temperature	25°C [77°F]
Base	36 months
Curing Agent	36 months

Shelf life from date of production, when stored in original, unopened containers. Thereafter, the product quality must be re-inspected. Storage at elevated temperatures may reduce shelf life. For advice, please consult Hempel.

### Storage conditions

- Product must be stored according to local legislation, at 40°C [104°F] without direct sunlight and protected from rain and snow.

# Hempathane Topcoat 55210

## Product characteristics

### Description

Hempathane Topcoat 55210 is a glossy polyurethane topcoat that is cured with aliphatic isocyanate and delivers good gloss and colour retention.

Complies with EU Directive 2004/42/EC, The Paints Directive on the limitation of volatile organic compounds: subcategory j.

### Recommended use

Hempathane Topcoat 55210 is recommended as a finishing coat for protection of structural steel in severely corrosive atmospheric environment, where colour fastness and gloss retention are required.

### Service temperature:

- Maximum, dry exposure only: 120°C [248°F].

### Certificates / Approvals

- EC-type examined as a low flame spread material when used as part of a predefined paint system. Please refer to "Declaration of Conformity" on [hempel.com](#) for further details.
- Complies with the European Fire Standard EN 13501-1, reaction to fire classification, when used as part of a predefined paint system. B-s1, d0.

### Features

- For severely corrosive atmospheric environment.
- The minimum temperature for curing is -10°C [14°F].
- Glossy with good gloss and colour retention.

## Product safety

**Flash point** 33°C [91°F]

### VOC content mixed product

Legislation	Value	10% thinning, by volume	Limit value, phase II (2010) <sup>a</sup>
EU	446 g/L [3.72 lb/US gal]	483 g/L [4.03 lb/US gal]	500 g/L [4.17 lb/US gal]
US (coatings)	446 g/L [3.72 lb/US gal]	-	-
US (regulatory)	446 g/L [3.72 lb/US gal]	-	-
China	446 g/L [3.72 lb/US gal]	-	-

According to specific legislation, see details in the Explanatory Notes available at Hempel website, [hempel.com](#) or at your local Hempel website. VOC values may vary with shade, please consult the Safety Data Sheet, section 9. <sup>a</sup>EU Directive 2004/42/CE.

### Handling

Handle with care. Before and during use, observe safety labels on packaging and paint containers and follow all local and national safety regulations. Always consult Hempel's Safety Data Sheet for this product along with the Product Data Sheet.

For professional use only.

## Product data

### Product code

55210

### Product components

Base 55219  
Curing Agent 95370

### Standard shade\* / code

White 10000 \*\*

### Gloss

Glossy

### Volume solids

51 ± 2%

\* Wide range of colours is available via Hempel's Multi-Tint® system.  
\*\* Colour stability may be affected by exposure to harsh chemical and/or high temperatures.

# Hempathane Topcoat 55210

**Specific gravity**

1.2 kg/L [10 lb/US gal]

**Reference dry film thickness**

50 micron [2.0 mils]

**Aluminium shade / code**

Aluminium grey 19002

**Gloss**

Please consult Hempel's Guideline on aluminium pigmented coatings.

**Volume solids**

48 ± 2%

**Specific gravity**

1.1 kg/L [9 lb/US gal]

**Reference dry film thickness**

50 micron [2.0 mils]

## Surface preparation

**Cleanliness**

- According to Hempel's Specification.

## New build:

- According to Hempel's Specification.

## Maintenance and Repair

- According to Hempel's Specification.

Consult Hempel's separate Surface Preparation Guidelines for more details.

## Application

**Mixing ratio**
Base 55210 : Curing Agent 95370  
(7 : 1 by volume)

Stir well before use.

**Thinner**

Hempel's Thinner 08080

**Cleaner**
Hempel's Thinner 08080  
Hempel's Thinner 08510
**Pot life**

Product temperature	10°C [50°F]	20°C [68°F]	30°C [86°F]
Pot life	6 hours	4 hours	2½ hours

**Application method**

Tool	Thinning max vol.	Application parameters
Airless spray	10%	Nozzle pressure: 150 bar [2200 psi] Nozzle orifice: 0.017-0.019"
Air spray	10%	Not Applicable.

If brush or roller application is used, more coats will be necessary to achieve the specified dry film thickness. To comply with Korean VOC regulation, thinning is limited to max. vol. 1%. Spray data are indicative and subject to adjustment. Pressure is for a material temperature of 20°C [68°F].

# Hempthane Topcoat 55210

## Film thickness

Specification range	Low	High	Recommended
Dry film thickness	40 micron [1.6 mils]	80 micron [3.1 mils]	50 micron [2.0 mils]
Wet film thickness	80 micron [3 mils]	150 micron [6 mils]	100 micron [4 mils]
Theoretical spreading rate	13 m <sup>2</sup> /L [530 sq ft/US gal]	6.4 m <sup>2</sup> /L [260 sq ft/US gal]	10 m <sup>2</sup> /L [410 sq ft/US gal]

Product may be specified in another film thickness than indicated depending on purpose and area of use. This will alter spreading rate, drying and curing time and overcoating interval. For best performance, avoid excessive film thickness.

## Application conditions

- To avoid condensation, apply on a clean and dry surface with a temperature that is at least 3°C [5°F] above the dew point.
- Surface temperature must be above -10°C [14°F] during application and curing.
- The film formation may be adversely affected by light rain, high humidity and/or condensation during application and the following interval after application: "10 hours, 20°C/68°F".

## Relative Humidity:

- Relative humidity must be below 85% during curing.

## Application remarks

- Two coats of the topcoat may be necessary to obtain full hiding power.

## Drying and overcoating

### Product compatibility

- Previous coat: According to Hempel's Specification. Recommended products are: Hempaprime Multi 500 45950/3, Hempadur Quattro series, Hempadur Avantguard series.
- Subsequent coat: None.

## Drying time

Surface temperature	-10°C [14°F]	0°C [32°F]	20°C [68°F]	40°C [104°F]
Touch dry	hours	2½	1⅓	¾
Surface dry	min	-	-	60
Fully cured	days	-	-	7

Determined for dry film thickness 50 micron [2.0 mils] at standard conditions, see Hempel's Explanatory Notes for details.

## Overcoating

Hempel's specification supersedes any guidelines indicated in the overcoating table

Quality name	-10°C [14°F]	0°C [32°F]	20°C [68°F]	40°C [104°F]
Atmospheric medium				
Hempthane Topcoat 55210	Min	30 h	18 h	6 h
	Max	Ext*	Ext	Ext

Overcoating times are indicative for products of the same generic chemistry. Consult Hempel's specification for more information.

## Drying conditions

- To obtain the drying time stated, it is important to maintain sufficient ventilation during application, drying and curing.
- Condensation on the freshly applied coating should be avoided.

## Overcoating details

- The surface must be dry and clean prior to application.

## Other remarks

- Hempel's Specification supersedes any recommendations given in the Product Data Sheets.

# Hempthane Topcoat 55210

## Storage

### Shelf life

Ambient temperature	25°C [77°F]
Base	36 months
Curing Agent	24 months

Shelf life from date of production, when stored in original, unopened containers. Thereafter, the product quality must be re-inspected. Storage at elevated temperatures may reduce shelf life. For advice, please consult Hempel.

### Storage conditions

- Product must be stored according to local legislation, at maximum 40°C [104°F], without direct sunlight and protected from rain and snow.
- The curing agent is sensitive to moisture. Store in a dry place and keep the can tightly closed until use.

## Additional documents

Additional information is available at the Hempel website <https://www.hempel.com/service-and-support/technical-guidelines> or at your local Hempel website:

- Explanatory Notes for Product Data Sheet.
- Application methods.
- Application Instruction for this product.

This Product Data Sheet ("PDS") relates to the supplied product ("Product") and is subject to updating from time-to-time. Accordingly, the buyer/applicator should have regard to the PDS supplied together with the relevant batch of the Product (and not an earlier version). In addition to the PDS, the buyer/applicator may receive some or all of the following specifications, statements and/or guidelines as listed below or as are available from the Hempel website under 'Products' at [www.hempel.com](http://www.hempel.com) (the "Additional documents").

No.	Document description	Location/comments
1.	Technical Statement	One-off specific advice provided on request for specific projects
2.	Specification	Only issued for specific projects
3.	PDS	This document
4.	Explanatory Notes to the PDS	Available at <a href="http://www.hempel.com">www.hempel.com</a> and contain relevant information about the Product testing parameters
5.	Application Instruction	Where available, at <a href="http://www.hempel.com">www.hempel.com</a>
6.	Generic technical guidelines (e.g. on application and surface preparation)	Where available, at <a href="http://www.hempel.com">www.hempel.com</a>

In the event of a conflict of information between the PDS and the Additional documents, the order of priority of information shall be in the order as set out above. In such event you should also contact your representative at Hempel for clarification. Furthermore, the buyer/applicator must have full regard to the relevant Safety Data Sheet provided with each Product and which can also be downloaded from [www.hempel.com](http://www.hempel.com).

Hempel shall not be liable for defects where the application of the Product has not been made fully in accordance with the recommendations and requirements set out in the relevant PDS and the Additional Documents. The information and terms of this disclaimer apply to this PDS, the Additional documents and any other documents supplied by Hempel in respect of the Product. In addition, the Product is supplied and all technical assistance is given subject to Hempel's General Conditions of Sale, Delivery and Service, unless otherwise expressly agreed in writing.

# Hempadur 85671

## Product characteristics

### Description

Hempadur 85671 is an amine adduct cured, phenolic epoxy (novolac) coating with very good adhesion and excellent chemical and high temperature resistance.

### Recommended use

Lining: As interior lining in tanks, pipelines, railcars, etc. for hot water, brine, crude oil, vegetable oils and other chemicals as per the Chemical protection guide (only valid for shades 11150 & 50900).

Process vessels and pipework: As external coating for the protection of insulated (CUI) and uninsulated process pipework and vessels including cryogenic conditions.

Subsea equipment: As corrosion protection for hot subsea equipment and structures according to NORSOOK system 7C.

### Service temperature:

- From -196°C [-321°F] up to 205°C [401°F] for dry or dry/wet exposure.
- Maximum, in water (no temperature gradient): 95°C [203°F].
- Other liquids: Please contact Hempel.
- Please consult the Chemical protection guide at [hempel.com](http://hempel.com).

### Certificates / Approvals

- Approved by WRAS for contact with potable water. Please consult <https://www.wrassapprovals.co.uk/approvals-directory/?search=Hempel&page=0> for detailed information.
- Complies with US FDA and EU food regulations for contact with liquid and dry foodstuff. Consult Hempel for details.
- Meets requirements to NORSOOK M-501 when used as part of a predefined paint system. Edition 6, System 3C, 3D, 3E, 3F, 7C.
- Tested and assessed according to Aramco SAES-H-101. APCS 2A, 2B, 2C.

## Product safety

**Flash point** 26°C [79°F]

\* Other shades are available, please contact your local Hempel representative.  
\*\* Slight discolouration may occur. This does not affect the performance of the coating.

### VOC content mixed product

Legislation	Value
EU	317 g/L [2.65 lb/US gal]
US (coatings)	317 g/L [2.65 lb/US gal]
US (regulatory)	317 g/L [2.65 lb/US gal]
China	317 g/L [2.65 lb/US gal]

According to specific legislation, see details in the Explanatory Notes available at Hempel website, [hempel.com](http://hempel.com) or at your local Hempel website. VOC values may vary with shade, please consult the Safety Data Sheet, section 9.

### Handling

Handle with care. Before and during use, observe safety labels on packaging and paint containers and follow all local and national safety regulations. Always consult Hempel's Safety Data Sheet for this product along with the Product Data Sheet.

For professional use only.

## Surface preparation

### Cleanliness

- Remove oil, grease and other contaminants by suitable detergent cleaning.
- Remove salts, detergents and other contaminants by high pressure fresh water cleaning.
- Concrete: According to Hempel's Specification.

### New build:

- Abrasive blasting to min. Sa 2½ (ISO 8501-1) / SP 10 (SSPC).
- Remove dust, blast media and loose materials.

### Maintenance and Repair

- Spot abrasive blasting to min. PSa 2½ (ISO 8501-2) / SP 10 (SSPC).
- Water jetting to Wa 2½ (ISO 8501-4).
- Flash rust degree of maximum FR M (ISO 8501-4).
- Remove dust, blast media and loose materials.

### Roughness

- Surface profile Medium (G) (ISO 8503-2).

Consult Hempel's separate Surface Preparation Guidelines for more details.

## Application

### Mixing ratio

Base 85675 : Curing Agent 97371  
(8.8 : 1.2 by volume)

Stir well before use.

### Thinner

Hempel's Thinner 08450  
Hempel's Thinner 08630

### Cleaner

Hempel's Tool Cleaner 99610

### Pot life

Product temperature	15°C [59°F]	20°C [68°F]	30°C [86°F]
Induction time	20 min	15 min	5 min
Pot life	3½ hours	3 hours	1 hour

### Application method

Tool	Thinning max vol.	Application parameters
Airless spray	10%	Nozzle pressure: 200 bar [2900 psi] Nozzle orifice: 0.017-0.021"
Brush	10%	Not Applicable.

If brush or roller application is used, more coats will be necessary to achieve the specified dry film thickness. As tank lining, brush and roller application must only be limited to stripe coating and touch up areas or minor repairs. Spray data are indicative and subject to adjustment. Pressure is for a material temperature of 20°C [68°F].

# Hempadur 85671

## Film thickness

Specification range	Low	Recommended	High
Dry film thickness	90 micron [3.5 mils]	100 micron [3.9 mils]	160 micron [6.3 mils]
Wet film thickness	130 micron [5 mils]	150 micron [6 mils]	230 micron [9 mils]
Theoretical spreading rate	7.5 m <sup>2</sup> /L [310 sq ft/US gal]	6.8 m <sup>2</sup> /L [280 sq ft/US gal]	4.2 m <sup>2</sup> /L [170 sq ft/US gal]

Product may be specified in another film thickness than indicated depending on purpose and area of use. This will alter spreading rate, drying and curing time and overcoating interval. For best performance, avoid excessive film thickness.

## Application conditions

- Temperature of product must be above 15°C [59°F] during application.
- To avoid condensation, apply on a clean and dry surface with a temperature that is at least 3°C [5°F] above the dew point.
- Surface temperature must be above 10°C [50°F] during application and curing.

## Relative Humidity:

- Relative humidity must be below 80% during curing.
- Relative humidity must be below 80% during application.

## Drying and overcoating

### Product compatibility

- Previous coat: None or according to Hempel's specification.
- Subsequent coat: None or according to Hempel's specification.

### Drying time

Surface temperature	10°C [50°F]	20°C [68°F]	30°C [86°F]	40°C [104°F]
Touch dry	hours	6	2	1½
Surface dry	hours	6	3	1½
Hard dry	hours	11	6½	3
Fully cured	days	13	7	5

Determined for dry film thickness 100 micron [3.9 mils] at standard conditions, see Hempel's Explanatory Notes for details.

## Overcoating

Hempel's specification supersedes any guidelines indicated in the overcoating table

Quality name		10°C [50°F]	20°C [68°F]	30°C [86°F]	40°C [104°F]
Atmospheric severe					
Hempadur 85671	Min	25 h	16 h	8 h	5 h
					6½ d
Immersion					
Hempadur 85671	Min	25 h	16 h	8 h	5 h
					6½ d

Overcoating times are indicative for products of the same generic chemistry. Consult Hempel's specification for more information.

## Drying conditions

- To obtain the drying time stated, it is important to maintain sufficient ventilation during application, drying and curing.

## Overcoating details

- If the maximum overcoating interval is exceeded, roughening of the surface is necessary to ensure intercoat adhesion.
- The surface must be dry and clean prior to application.

## Other remarks

- Epoxy coats have an inherent tendency of chalking in outdoor exposure. This does not affect the performance of the coating.
- Hempel's Specification supersedes any recommendations given in the Product Data Sheets.

## Storage

### Shelf life

Ambient temperature	25°C [77°F]	35°C [95°F]
Base	12 months	9 months
Curing Agent	12 months	8 months

Shelf life from date of production, when stored in original, unopened containers. Thereafter, the product quality must be re-inspected. Storage at elevated temperatures may reduce shelf life. For advice, please consult Hempel.

# Hempadur 85671

## Storage conditions

- Product must be stored according to local legislation, at maximum 40°C [104°F], without direct sunlight and protected from rain and snow.
